DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to an apparatus and method of treating defibrillation as determined by a maximum refractory threshold value classified in class 607, subclass 14.
- II. Claims 21-31, drawn to a device and method for treating defibrillation as determined by a minimum post refractory period, classified in class 607, subclass 25.

The inventions are distinct, each from the other because of the following reasons:

Invention I as compared to invention II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are disclosed as alternative systems and methods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
